DESIGNED FOR REAL LIFE

MADE IN GERMANY

NOLTE NEO

NOLTE NEO

DESIGN IN THE CONTEXT OF LIFE

Rooms are as diverse as the people who live in them. A loft in London, a chalet in the Alps, an apartment above the rooftops of Dubai – each shaped by architecture, light and surroundings. Every place follows its own logic, develops its own atmosphere and its own pace. Design does not emerge in isolation. It responds to what already exists – to proportions, materials and use. Kitchens integrate into these structures, connect functions and create transitions. They are part of a whole, not a staged addition.

nolteneo sees design as something that proves itself in everyday life. Not as an image, but in use. Materials reveal their quality over time, functions arise from real needs. Elements can be combined, adapted and further developed – creating spaces that feel natural rather than staged. A composition of design, ergonomics and flexibility shapes kitchens that adapt to different ways of living. Not a static concept, but a system that works with the space and its users – precise, high-quality, made for everyday life. For spaces that are not staged, but lived in.

CONCEPT. DESIGN. FREEDOM.

THIS IS NOLTE NEO

Design does not begin at the surface, but with the concept behind it.

nolte**neo** expands the kitchen with new possibilities – in planning, in materiality and in the way elements relate within a space. This results in solutions that do not appear standardised, but are conceived individually.

Lines become a conscious design decision. Whether with an integrated handle profile or fully reduced – surfaces remain calm, transitions clear, proportions precise. Shadow gaps define fine contours, and light can be guided deliberately, adding depth to the architecture.

The interior follows the same clear logic. Different carcass heights create customised storage space and adapt to a variety of needs. neoBOX consistently continues this principle: precise lines, calm organisation, reliable function. A pull-out system designed for everyday use.

nolte**neo** understands kitchens as an open concept – adaptable, combinable, and continuously evolving. For spaces that develop. And for the people who use them.

OAK BIANCO

The grain comes alive through the interplay of light and shadow.

52°29' N, 13°23' O

SUBSTANCE THAT REMAINS

Rooms like this carry history in every layer. Stucco, herringbone parquet, walls with a patina – everything speaks of substance, not staging. Light falls softly and enhances the depth of the materials. The design remains deliberately restrained. It aligns with the architecture, follows existing axes and preserves proportions. The kitchen does not appear as an addition, but as a continuation. neoFLAT in Oak Bianco expresses this attitude: warm, precise, calm. A composition that integrates – and unfolds its presence exactly there.

with a rounded worktop

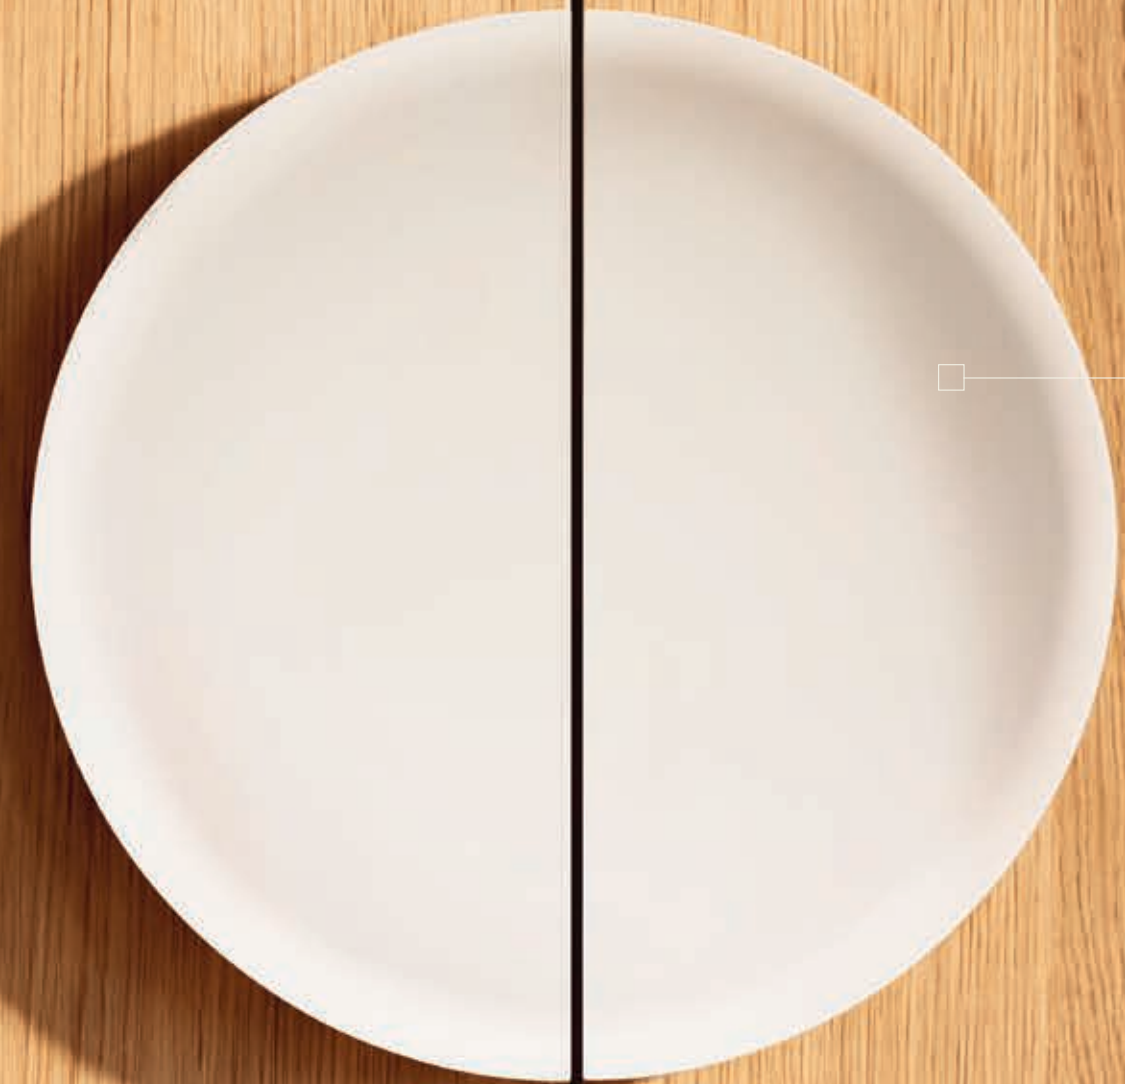

MatrixZERO

CLEAN SHAPES AND LINES

A worktop extended into a seating area prolongs the island into the room and turns it into a connecting element between function and living. The space appears clear and open. MatrixZERO makes the design deliberately restrained. The absence of handles or visible finger pulls creates seamless surfaces that highlight the structure and proportions.

NOLTE NEO DESIGNER HANDLE

Just a few deliberately placed elements change the effect of a room. The designer handle becomes a conscious intervention in the calm surface – precisely positioned, clearly legible. On the buffet unit, the large-format handles appear as striking accents, creating a contrast to the understated grain of oak bianco. This creates a field of tension between structure and detail.

Decorative handle

neoSLIM

OAK TOBACCO

Genuine wood and genuine lacquer in perfect harmony.

52°24' N, 13°04' O

STRUCTURE THAT CONNECTS

City life continues inside. Light falls through tall sash windows, drawing clear grids and meeting wall surfaces with rhythm and depth. Architecture becomes the organising principle. The design develops from the line. It adopts structures, condenses them and carries them forward. Slim frames, precise edges and reduced surfaces integrate naturally. neoSLIM and EVORA LACK translate this attitude into materiality: genuine wood meets genuine lacquer – oak tobacco with greige soft mat. A controlled, urban tension that integrates effortlessly into the space.

Genuine wood veneer
with a 10 mm delicate frame

HARMONY IN THE DETAILS

neoSLIM, with its delicate frame, is part of the nolteneo genuine wood concept. Wood decors are not just for fronts – they can continue to panels, apertures and visible sides. This consistent use of material unites the interior design and furnishings.

NOLTE NEO SHADOW GAP

The highboard stands lightly on the black plinth frame and appears almost to float. The deliberately restrained neoFLAT design allows the details to stand out clearly. The surrounding shadow gap draws a graphic contour between the front and the side panel, adding depth to the composition, while decorative handles create a striking accent.

neoPURE

METAL GOLD

With neoPURE, metallic lustre
meets anti-fingerprint properties.

40° 43' N, 74° 0' W

CONTRASTS THAT SHAPE SPACE

Open-plan layouts, free-standing columns and generous window areas define the setting. The space is expansive, reduced, almost raw. Direct light falls in, creating contrasts and revealing surfaces in their immediacy. The design works with contrasts. Clear forms meet expressive structures, calm surfaces meet distinctive details. Tension arises not from decoration, but from the interplay of elements. neoGRID in black expanded metal introduces an additional graphic layer. neoPURE in Metal Gold creates reflections and spatial depth. neoLODGE in blackened oak grounds the overall composition – powerful, calm, precise.

Aluminium frame
with expanded metal

STRUCTURE AS AN ACCENT

neoGRID reinterprets display cabinets.

Black expanded metal framed in a clean aluminium frame replaces glass and alters the perception of the contents behind. In combination with light, this creates an interplay of transparency and structure – reduced, distinctive, atmospheric.

neoGRID DESIGN ELEMENT

Designer fronts shape the feel of a room. They structure surfaces, create contrasts and define planes – they are architecture, not just decoration. neoGRID translates this approach into an urban design. Expanded metal set within an aluminium frame creates depth and rhythm, inspired by open-plan loft spaces. When combined with dark worktops or delicate plinth frames, the result is a composition full of fascinating tension.

Available in heights of 17 or 30 cm

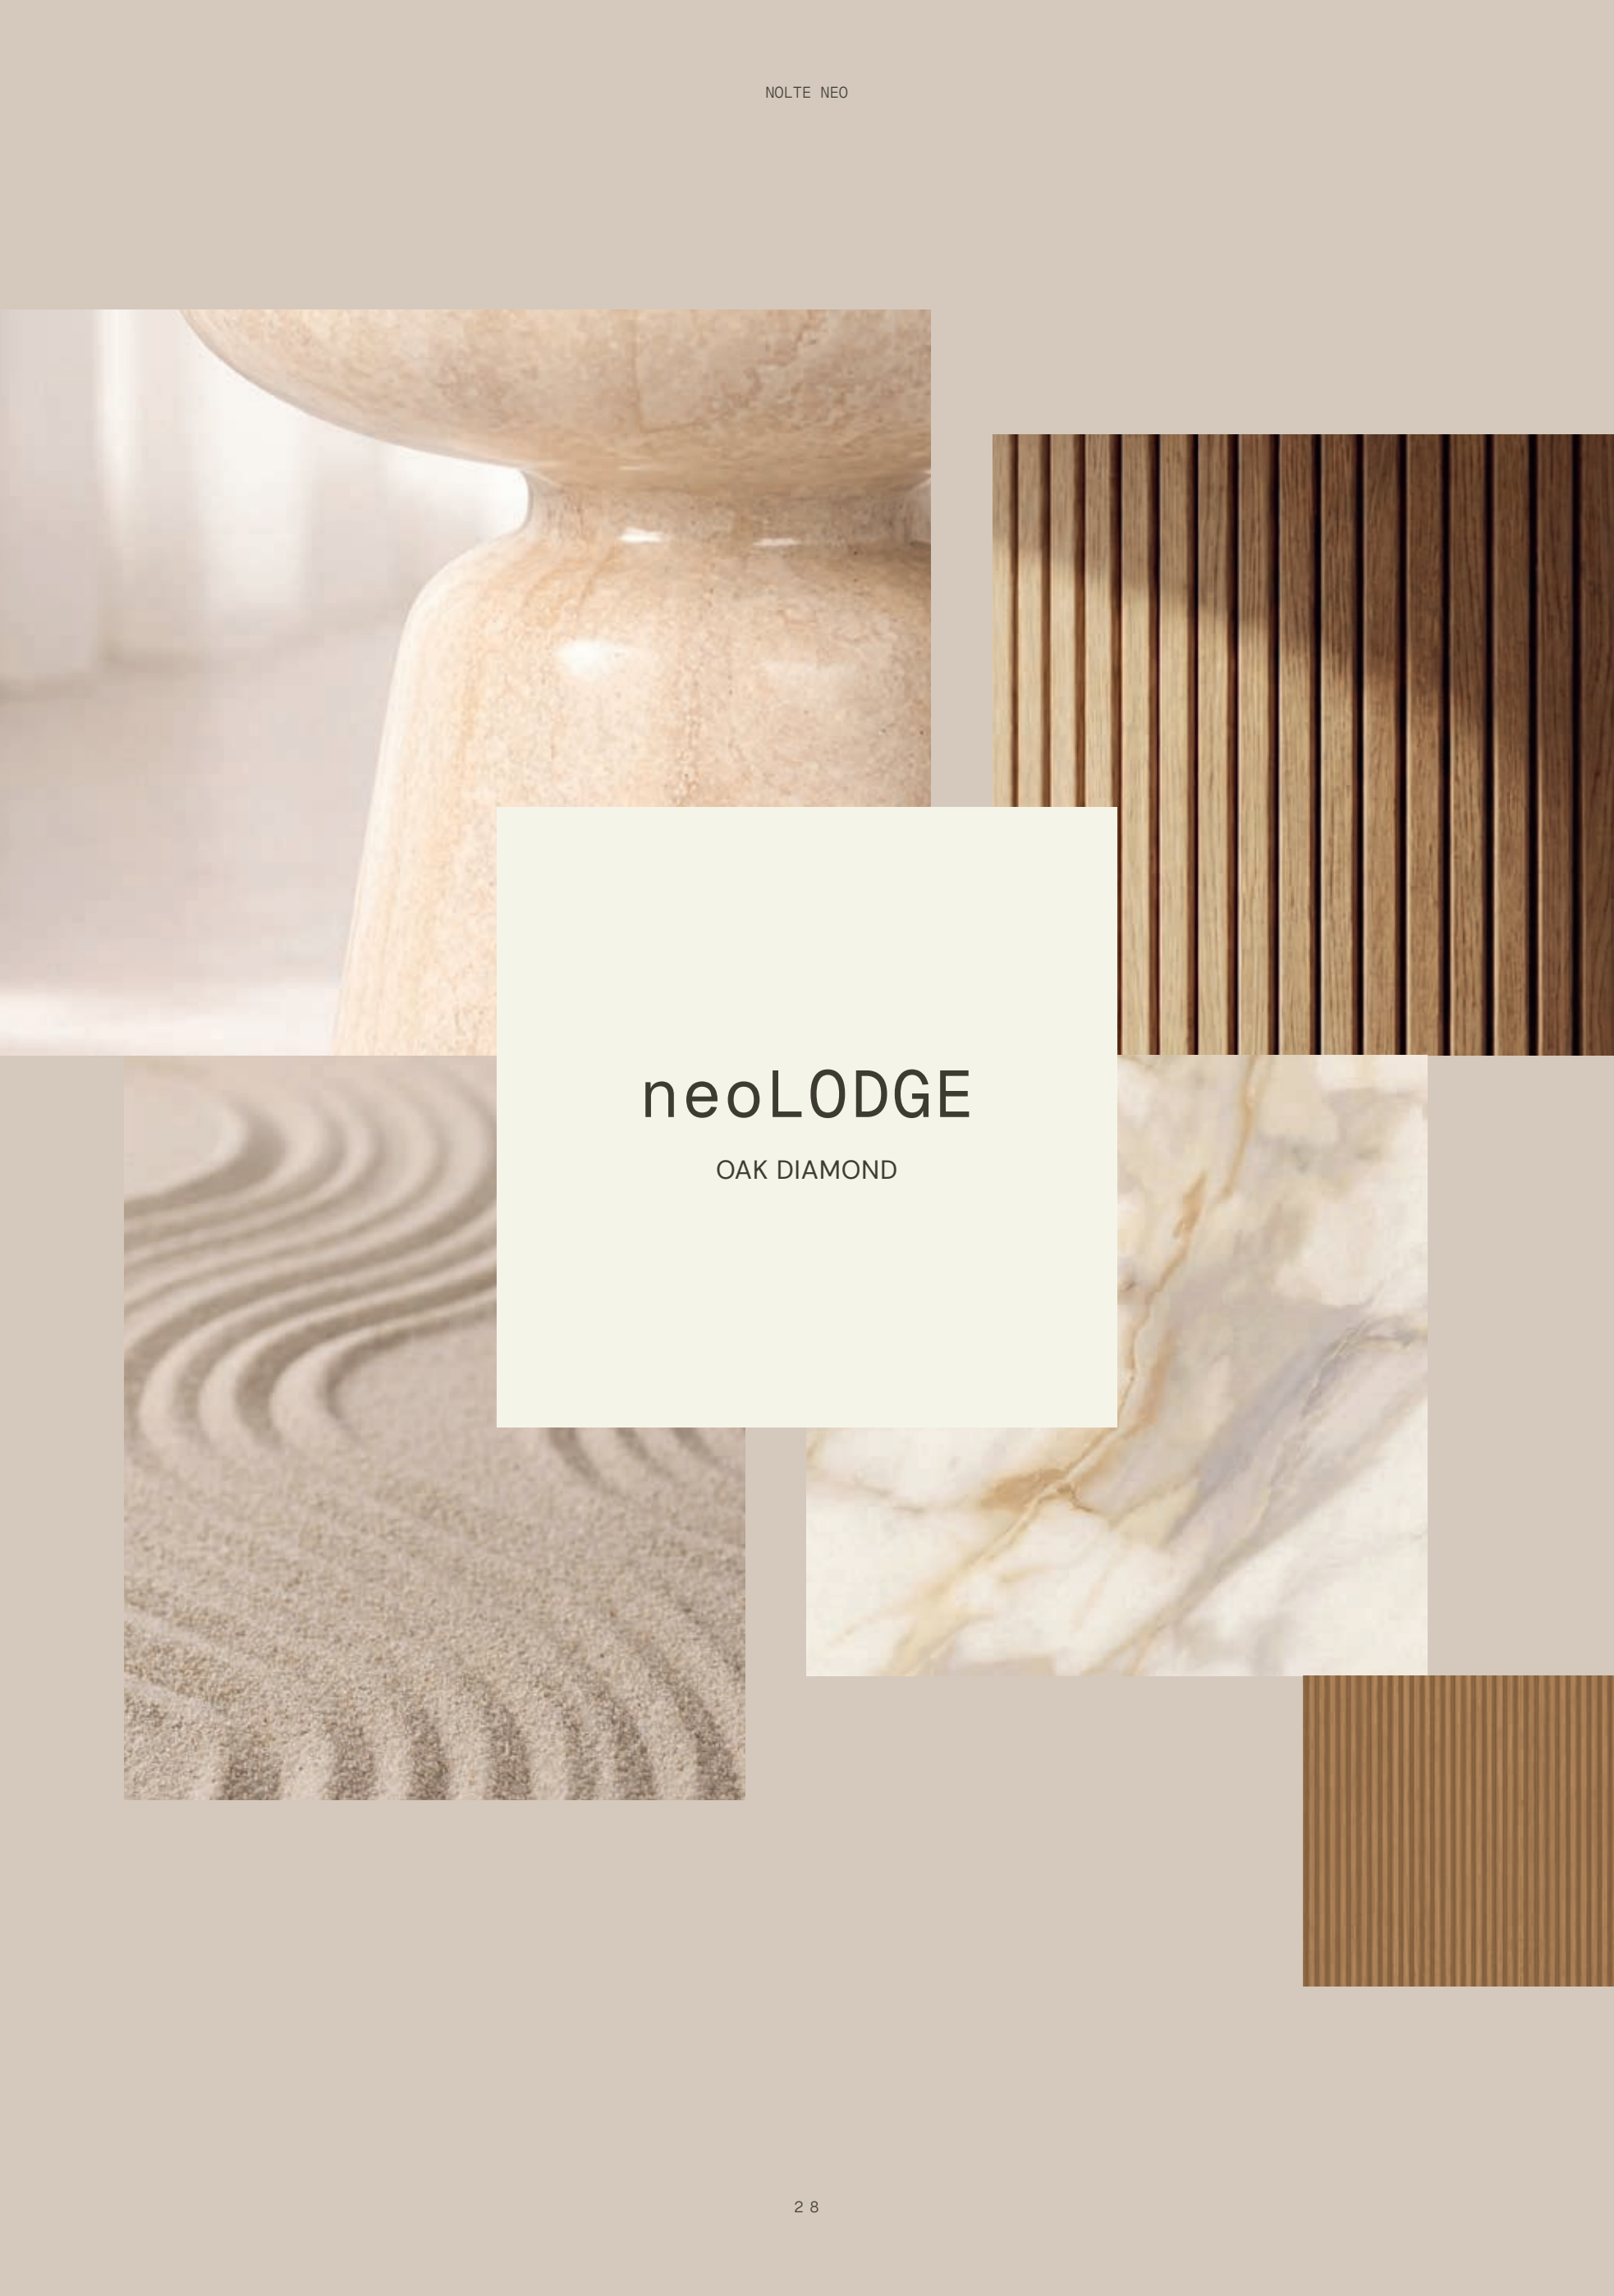

LIGHTNESS IN CONSTRUCTION

Solid elements lose their sense of weight when lifted off the floor. The black aluminium plinth frame raises even heavy elements, giving them a new lightness. Different heights allow for precise adaptation to the space and its proportions.

SIDE PANNELLING

Side panelling extends the materials seamlessly, giving kitchen runs and islands a look of consistent solidity. The overall style is cohesive and minimalist. In heights of 60, 75 and 90 cm, this nolteneo design option is not only available for MatrixArt but for any kitchen – offering maximum freedom of design.

neoLODGE

OAK DIAMOND

25° 16' N, 55° 18' O

LIGHT THAT DISSOLVES SPACE

neoLODGE combines natural warmth with precise lines, creating a light and architectural effect.

Large-scale glazing opens the interior to the outside. Light floods the space, reflecting off bright surfaces and almost dissolving boundaries. Architecture becomes a stage for light. The design follows this openness. Surfaces remain reduced, materials light and calm, transitions fluid. The room appears light, almost dematerialised. neoLODGE in diamond oak introduces a subtle, natural structure. PEARL in sand metallic captures and reflects the light. This composition is more than just an image of vastness, it truly makes it tangible.

STRUCTURE IN THE VERTICAL

Vertical grooves give the surface depth and rhythm. Light moves along the structure, emphasising the grain and bringing the material to life. neoLODGE in diamond oak combines this fine texture with a light, natural hue. The combination with calm, light-coloured materials creates a balanced composition.

PEARL SAND METALLIC

Sand metallic integrates seamlessly into the overall concept and softens the light. The surface remains understated yet present. PEARL translates this effect into a finely shimmering acrylic surface. An all-round bevel refracts the light and creates depth – subtle yet precise. The anti-fingerprint properties support the calm, flawless surface in everyday use.

Front and panels
made of acrylic glass

SPACE FOR CREATIVITY

Spaces are created from possibilities – conceived flexibly and individually configurable. nolteneo expands planning beyond the kitchen. Components can be combined and extended individually, creating cohesive spatial solutions – without boundaries, but with consistency.

LIVING ROOM FURNITURE

A coordinated sideboard and shelving units continue the kitchen's materiality into the living space. Transitions are designed to be fluid. Areas merge into one another, forming a coherent whole. Recurring colours and materials connect the zones – creating a space that is consistently planned and feels intuitive.

neoFLAT

WALNUT ROSADO

Open-plan spaces with a striking personality.

51° 30' N, 0° 8' W

ARCHITECTURE THAT UNITES

Classic architecture creates a clear framework: high ceilings, defined wall sections and a strong horizontal base. This creates a space that allows both openness and intimacy. Design connects these levels. The kitchen becomes the central element within the space – calm, present and unifying. Transitions remain fluid, functions recede into the background. Walnut rosado adds depth and warmth to the spatial axis, while cashmere soft mat opens the surface towards the front. A composition that does not stage encounters, but allows them to emerge.

MatrixArt ONE with
a single finger pull

PRECISION IN THE DETAILS

Impact often arises from detailed decisions. Lines, light and surfaces interact and shape the atmosphere. MatrixArt ONE reduces the design to a clear finger pull, complemented by push-to-open. Light sets deliberate accents and gives the cashmere soft mat colour a subtle nuance.

DECORS TO MATCH THE SURROUNDING ELEMENTS

Consistent use of materials creates a particular sense of balance. Walnut rosado continues across niches, side panels and shelving units, connecting the individual elements into a cohesive whole. Visible sides, plinths and panels can also be coordinated – for a consistent design that extends beyond the kitchen.

neoSLATE

SLATE, DEEP BLACK

Raw. Precise. Balanced.

53° 32' N, 9° 59' O

REFLECTION THAT CREATES DEPTH

Vaulted ceilings, raw wall surfaces, solid structures – the space appears both heavy and open at the same time. Light is reduced, used deliberately and emphasises surfaces and structure. The design works with reflection and density. Surfaces visually expand the space or deliberately condense it. Contrasts arise between reflection and absorption. Mirrors introduce movement into perception. neoSLATE in genuine slate creates a calm, almost absorbing depth. A composition of contrasts – precisely composed.

HIGHLIGHTS

neoSLATE

MATERIAL WITH PERSONALITY

A concept that is intentionally thought differently. Surfaces reveal structure and natural irregularities, bringing the space to life. neoSLATE, with its stone veneer made from genuine slate, carries this quality into the design. Each front is unique – individual and with its own material presence.

DESIGNER FRONT neoMIRROR

Mirrors expand a room and alter the way we perceive it. They double visual axes and create new planes – ever-changing, depending on the viewer's perspective. neoMIRROR makes deliberate use of this effect. Tinted mirrors create a calm reflection that visually expands the room while, at the same time, expressing an understated elegance.

neoMIRROR
Mirror, tinted

neoPURE

METAL BRONZE

Clean lines, natural materials and earthy tones.

50° 55' N, 6° 54' O

REDUCED FORMS THAT CREATE WARMTH

This room thrives on balance. Clean lines, reduced forms and a calm colour palette create a sense of quiet harmony. Light is guided softly, emphasising surfaces without drawing attention to itself. The design follows a consistent principle of reduction. Every element is intentional – nothing is left to chance. Materials speak for themselves: warm, honest, understated. LEAF in Nocce Marone brings depth and a natural texture, while neoPURE in bronze adds a subtle reflection. The result is a calm, focused composition – reduced to the essentials.

MatrixZERO: the perfect
complement to the shadow gap

A 12 mm thick, all-
round shadow gap for a
striking graphic look

12 mm wide shadow gap

RESTRAINT WITH IMPACT

An integrated moulding forms the basis for the 12 mm wide all-round shadow gap. It separates the worktop, panels and plinth area, creating precise contours – understated yet striking in its overall effect.

neoBOX

In the interior, nolteneo's design principle becomes clearly visible. The neoBOX combines a slim anthracite frame with a structured interior organisation. Integrated LED light strips illuminate the interior and switch off automatically when the drawer is closed. The battery capacity is sufficient for up to 700 opening cycles – efficient, unobtrusive and perfectly suited for everyday use.

neoBOX

neoLINE

OAK BIANCO

Light materials, soft light and simple forms
define the atmosphere.

43° 21' N , 11° 1' O

NATURAL LIGHTNESS

Natural light defines this room. Large windows, light-coloured surfaces, smooth transitions. Everything feels airy, open and natural. This design is all about clarity and function. The materials fade into the background, enhancing the effect of light and space. neoLINE, with its fine texture, adds a natural depth, while PERFECT PLUS in white soft mat intensifies the brightness of the space. A design that creates a sense of calm – and allows the space to breathe.

Matrix800 —
80 cm carcass height

The Matrix800 carcass height has been awarded the Kitchen Innovation Award

CLARITY IN STRUCTURE AND FUNCTION

Restraint creates a sense of calm. With no handles or finger pulls, the symmetrical layout of the fronts takes centre stage and contributes to the tranquil atmosphere of this room. MatrixZERO, combined with Matrix800, demonstrates this principle while also creating ample storage space within the 80 cm high carcass.

INTERIOR PULL-OUT UNITS WITH GLASS PANELS

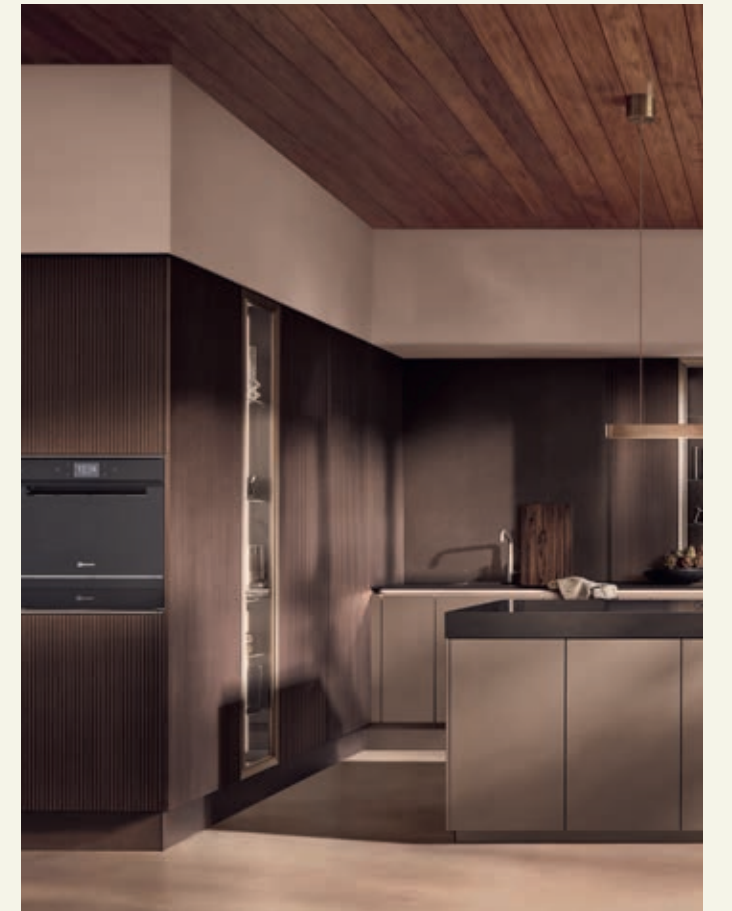

With a height of 40 cm per pull-out, Matrix800 makes full use of the space behind the fronts – even large items will fit. neoBOX interior pull-outs with a satin-finished glass panel add a stylish touch and can be custom-equipped as needed. Optional integrated LED light strips in the side frames improve visibility.

Glass with a satin finish

neoLODGE

BLACKENED OAK

Natural materials, reduced to the essentials.

47° 22' N , 8° 32' O

STRUCTURE AND WARMTH IN BALANCE

A generously proportioned space with a clear structure – a place of architectural calm. Surfaces, heights and materials are precisely coordinated, creating a sense of permanence and balance. Wood and stone echo the architecture's structure, taking it up and carrying it forward. The design follows this clarity. The kitchen integrates seamlessly and becomes part of the whole. neoLODGE adds natural depth, while SOFT LACK introduces a calm, understated surface. A composition that remains restrained – yet makes an impact.

MatrixArt ONE

SOFT LACK Magma soft mat
from the Nolte Küchen range

neoLODGE BLACKENED OAK

Vertical grooves give the surface a certain flow and the room a clear, architectural structure. The dark hue of blackened oak lends a sense of calm and depth to the overall composition. Display cabinet elements in manganese bronze add warm, metallic accents. The result is a balanced interplay of structure and reflection – precise, calm and full of personality.

MatrixArt ONE

MatrixArt ONE defines handleless design with clean lines. A full-length handle recess profile beneath the worktop structures the surface and lends it a sense of graphic precision – optionally enhanced by lighting. The top pull-outs are opened using the profile, while the ones below are equipped with push-to-open. This creates a calm, uninterrupted front whose function is immediately apparent.

NOLTE NEO

EXCLUSIVE

MATERIALS AND DESIGN

NOLTE NEO IN DETAIL

nolteneo transforms Nolte Küchen into an exclusive design experience. A wide range of planning options and refined details offer maximum freedom – right through to customisable visible sides.

Whether with handles, finger pulls or handleless: clean lines, floating islands and precise joint patterns define the reduced overall look. High-quality materials such as genuine wood veneer, slate, mirror and expanded metal create distinctive surfaces and tailored solutions for a wide variety of spaces.

Glass with a
satin finish

CLEAR DESIGN — neoBOX

The neoBOX brings sophisticated design to the unit interior. Slim side frames, pared down to the essentials, lend the system a clean, understated elegance. With its anthracite colouring, the neoBOX blends seamlessly into the graphite hue of the collection. High-quality materials define the look – for instance, satin-finished glass panels on interior drawers and pull-outs. Clean lines and precise craftsmanship shape the design.

The neoBOX also features impressive functionality: From a pull-out height of 45 cm, an extra-high side frame offers additional convenience. Optional integrated LED light strips subtly highlight the contents of the units and help you find what you need when you look inside. The light switches off automatically when the unit is closed – a clever and efficient feature, with a battery life of up to 700 opening cycles.

INTERIOR ORGANISERS

KEEPING YOUR LIFE NEAT AND TIDY

Discover interior
organisation here

Everything has its place – making it easy to find at all times. The nolte**neo** range offers a wide variety of interior organisers that skilfully combine function and design. From the hob to the dishes, from cutlery to waste separation:

Drawers and pull-outs can be customised to suit any need and help keep your daily routine running smoothly. With integrated lighting as an optional add-on, the result is an interior that is not only well-organised but also aesthetically appealing.

NOLTE NEO EXCLUSIVE

GENUINE WOOD CONCEPT

The nolteneo genuine wood concept opens up a wide variety of options for customised designs. Three different front variants – minimalist and smooth, with fine grooves or as a delicate frame – each add their own touch.

In combination with three select wood hues, they make for a collection that unites natural flair and freedom of design. In addition, all surrounding elements can be designed to fully match – from visible sides and panels to apertures, shelf units and other elements.

THREE FRONT STYLES. THREE WOOD HUES. FULLY CUSTOMISABLE.

DESIGN
CONCEPTS

MATRIXART ONE

MatrixArt ONE is our design-oriented handleless kitchen: A single recessed handle profile beneath the worktop creates a particularly clean, graphic look. The handle recess profile can be illuminated, including in MatrixArt ONE – when combined with slim worktops, this creates a particularly delicate effect, practically making the worktop look like it is floating. As a rule, the top row functions as a drawer that is pulled out by hand, whereas the bottom row can be opened simply by Push-To-Open.

MATRIXZERO

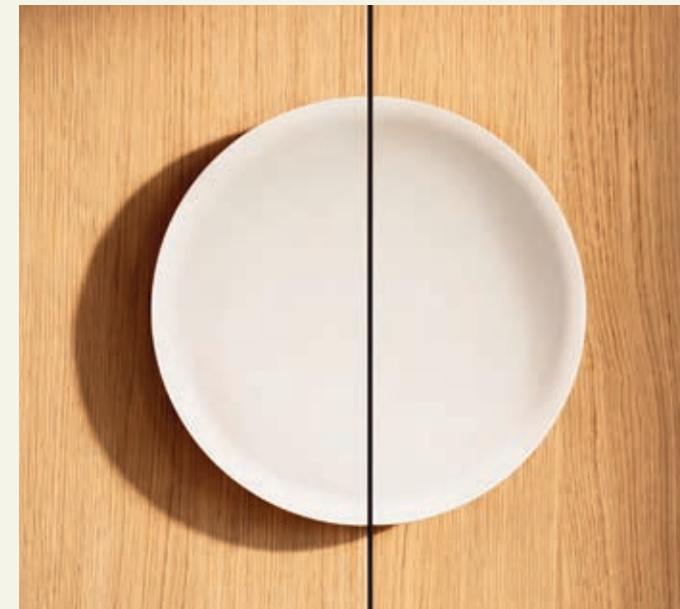

MatrixZERO makes handles and handle recess profiles entirely unnecessary, thereby creating an even more minimalist look for the front. With the help of Push-To-Open, it is possible to achieve an extremely seamless and graphic look for handleless kitchens. For a particularly convenient and elegant combination, add a shadow gap as a design option.

SHADOW GAP

An all-round shadow gap between the front and panel creates completely new contours that add a stylish design element to every kitchen block. The flexible combination of decorations for the fronts, worktops and visible sides opens up entirely new options for creating a personalised kitchen design – with our new shadow gap serving as a graphical highlight.

NOLTE KÜCHEN — THE FULL RANGE

Nolte Küchen - a name that represents exceptional quality, diversity and service - as well as reliability and continuity. Good is simply not good enough for us. And this applies not only to the materials we use, but equally to planning, technology and design.

A PLUS FOR ADDED POSSIBILITIES

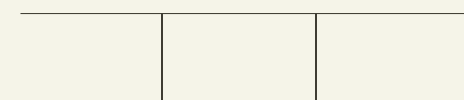

Flexibility and individuality are key to interior design, now more than ever. Under the name MATRIX+ we offer an expanded range of three carcass heights, all of which are perfectly adapted to your needs.

MATRIX750

THE CLASSIC OPTION

The standard carcass height for a classic kitchen design combines optimised storage space with an ergonomic working height and is the perfect match for a wide variety of kitchen styles. With its timeless versatility, it suits both traditional and modern designs.

MATRIX800

THE DESIGN-FOCUSED CHOICE

Matrix800 offers more storage space and a plethora of options for focusing on great design. This carcass height makes it possible to integrate 40 cm high pull-outs and 20 cm high drawers to optimise use of the available space and create a contemporary look. Nolte Küchen received the Kitchen Innovation Award 2025 for this innovation.

MATRIX900

MAXIMISED VOLUME

Matrix900 is the perfect solution for anyone looking for maximised storage space and modern design. With a particularly low plinth and a carcass height of 90 cm, it creates a home-like ambiance and provides a convenient, ergonomic working height, without compromises.

MAT LACQUER CONCEPT

Nolte Küchen's mat lacquer concept opens up a wide range of possibilities for customised designs. 20 carefully coordinated colours and six front designs offer a wide range of options for different design approaches.

The colours have been selected deliberately to combine beautifully with each other – ranging from warm, cosy shades to cool, modern hues. Matching handle designs in mat lacquer further enhance the design, creating a harmonious overall look or introducing deliberate contrasts.

GOOD TO KNOW

All 20 colours are available in six front designs and as handle colour options.

Nolte Küchen received the Kitchen Innovation Award 2026 for its mat lacquer concept.

Our products are made in Germany – and this is officially certified by the Verband Deutsche Möbelindustrie Deutschland e.V., the association of the German furniture industry.

The Golden M guarantees certified quality, safety and healthy living.

According to the latest customer survey by the German Institute for Service Quality (DISQ), Nolte Küchen is one of the three most popular kitchen brands in Germany.

We take our responsibility for our environment and future generations seriously. This makes us especially proud to hold several certifications in this context!

” At Nolte Küchen we combine our passion for high-quality kitchens with a profound sense of responsibility for our environment and future generations. ”

SUSTAINABILITY AT NOLTE

Inherent throughout our entire company and its entire value chain, the guiding principle of sustainability is reflected in everything we do and the way we think. It is firmly embedded in our broad-ranging corporate strategy with a view to achieving lasting improvements for mankind and nature.

OUR COMMITMENT TO ...

THE COMPANY

As a matter of good corporate governance and the associated values, we have established resilient structures, processes and partnerships over a period of many years. High quality; modern aesthetics, sustainability and an attractive price-performance ratio are the factors that are always taken into account in our product range. So, for instance, over 99 % of the woods we use complies with the principles of sustainable wood criteria. (FSC®- and PEFC certification).

PEOPLE

Our members of staff are particularly close to our heart. Their dedication, knowledge, experience and curiosity are what define us as Nolte Küchen. For this reason, we are pleased to assist our staff in furthering their development – both on the work side through basic and further training as well as on a private level by respecting and enhancing their work-life balance.

THE ENVIRONMENT

As a company, we have made it our aim to maintain a responsible and sustainable use of natural resources. Thanks to our effective sustainability management, we are able to manufacture our products with a climateneutral balance at our Löhne and Melle locations. The main fuel sources at Nolte Küchen are certified green electricity and our boilers, which operate with offcut wood from production.

SOCIETY

Ever since Nolte Küchen was first founded, we have cultivated close ties with the region, and we actively foster its well-being and growth. Social commitment is a tradition for us, and we have placed great emphasis on it from the very first day. We help people and regions in emergency situations, such as educational institutions, associations and foundations that are involved in child protection. Our motto: We give support where support is needed.

The grounds of Nolte Küchen have been home to local bees since the summer of 2023, and they have already brought their first nectar into their hive. They not only provide delicious honey but are also indispensable pollinators, making a significant contribution to the preservation of many plant species.

On request, our products are available with FSC® or PEFC certification. Please contact us for further information.
